## Cinema Sessions

Expanding on Sonic Reality's latest "Sounds for Film" and other media category, Cinema Sessions offers unique sonic effects with a musical twist! Whether it is orchestral hits and swells or wild symphonic effects you'd hear in a blockbuster movie or 3 dimensional WHOOSHES for a car commercial or a transition cue on TV or the exotic ambience of ancient Aztecs to use in Film, Music or any media production, Cinema Sessions is the ideal source for any music composer, DJ or media producer.

**Gold Edition** features all 4 of the first Cinema Sessions volumes newly released in 2010. It also includes extra exclusive ambient cinematic pads with outrageous moods and atmospheres suitable for anything from "other world" scenes in a movie to deep drones for electronica to beautiful sonic textures that suit any type of composition. The Cinema Sessions Gold Edition has over 2,010 patches included in a master collection of musical sonic effects for film. Media and music production. Available on disc or pre-installed on the new Infinite HD hard drive.

**Symphonic Effects** contains over 400 orchestral effects for film, tv, games and popular music styles. From sci-fi/suspense/horror hits, drones and intertwining melodies to emotional build-ups this collection offers a wide assortment of hard to find symphonic effects you can use to create the ultimate sound track. Special features include instant forward and reverse playback, time stretch, built-in effects and quick layering capabilities for building an infinite amount of complex new textures. Symphonic Effects offers world-class film score quality effects to use in any style of music or multimedia production royalty free.

**Global Atmospheres** contains over 350 samples of exotic sounds from all over the world. From tribal Native American drums to Ancient Aztec Ambiance to rare sounds from the Mediterranean this collection is a must-have for any media producer, sound designer or music composer. Whether you are creating authentic world sound effects for films and video games or wanting to add ethnic sonic flavors to electronic, rock, pop and world music, it delivers a diverse range of rare sonic landscapes, percussion loops, authentic voices and ethnic instrument riffs.

**Dimensional Effects** features over 450 outstanding special effects and dimensional rhythms for music and multimedia production. Featuring special 3-D sound encoded whooshes, deep booms, big bangs and various electronica effects whiz by with a futuristic sound ideal for modern production. Whether you are creating transition cues for television, radio and other multimedia or wanting to create modern music, cutting edge warped electronica or avant-garde soundscapes, Dimensional Effects adds instant twisted sound design to any production.

**Ambient Atmospheres** features a combination of film texture pads, drones and ambient soundscapes with 96k ambient sound effects from Sonic Reality. With the type of sound effects you'd hear in films and video games to effects used in a musical context such as classic rock albums or ambient electronica, Ambient Atmospheres has a wide range of Thunder Storms, European Train Announcers, Airports, Oceanic Soundscapes, Close Range Fireworks, Birdsong, Dog Barks and futuristic "other world" sound design. Special features include instant forward and reverse playback, time stretch, built-in effects and quick layering capabilities for building an infinite amount of powerful ambient soundscapes.
